**Message:**

Sorry to have not participated much in the discussions so far during the Board meeting. I've been engulfed with trying to get 3 conference-related websites functioning (main, Registration, Abstract submittal). This is coming together, and hopefully by Feb 2nd it will all be available to the public. As soon as I'm over that hump, I'll provide some more details. If you're curious, a couple of links to go to see the nearly complete drafts are:

Registration: <https://webapps2.utah.edu/conferences/fogsl/>

Abstracts: <https://sail2.ext.usu.edu/isslr/Abstract1.cfm>

Conference website: <http://www.isslr.org/gsl2008/in/>

These should all link together well, so that someone will not know that the electrons are bouncing around all over the western U.S. when they access different parts.

Wayne this link did not to work for me but the other two did. I did not follow through all links in each page but will try them later. The initial pages loaded fast and looked good. Are you going to have all of the speakers listed in the drop down box or just the key note speakers? Regards Mark

**Message:**

The registration and abstract submission site for the ISSLR meeting is now available at:  
<http://www.isslr.org/GSL2008/in/default.aspx>

The site is still being reorganized, but all of the information is there, including a page describing how scientists from developing countries can apply for partial support to attend the meeting. Funds for this, however, are limited, so only a few scientists will be able to receive support.

I would appreciate it if you could forward this message to your colleagues who might be interested in registering. I hope that Bob will soon send out an advisory to all those he has on his ISSLR mailing list.

Sincerely,

Wayne Wurtsbaugh

**Message:**

I am worry about participation of foreign students in the next congress. I mentioned US visas could probably be a problem. I don't know if this will be the case for different countries but in words of the US Embassy personnel, "Mexican students do not qualify for US -tourist- visas". At the moment, two of my students were rejected and we will know soon the fate of a third one.
